The Leibniz-Institut für Analytische Wissenschaften - ISAS - e. V. develops efficient analytical methods for health research. Thus, it contributes to the improvement of the prevention, early diagnosis, and therapy of diseases like cardiovascular diseases, autoimmune diseases or cancer. Overall, the institute strives to advance precision medicine by combining knowledge from different fields such as biology, chemistry, pharmacology, physics, and computer science. ISAS is a member of the Leibniz Association and is publicly funded by the Federal Republic of Germany and its federal states.

The aim of the project is to develop new methods for biological research that are not based on animal models ("non-animal testing"). Bio-printed 3D cell cultures are created that are NMR-compatible and will enable to study transport processes in such tissue-like models in vitro.

In the field of Nuclear Magnetic Resonance Spectroscopy in Dortmund we invite applications for a **Scientist/Postdoc (m/f/d).**

You will be responsible for:

- Running and maintaining two 600 MHz NMR spectrometer equipped with cryo- and MAS-probe
- Conceptual planning of new NMR experiments
- Evaluation and interpretation of large data sets of metabolites/lipids
- Applying suitable statistical methods for data evaluation
- To develop in close cooperation with biologist printed 3D cell culture models and appropriate microfluidics to maintain physiological conditions during NMR measurements
- Supervision and assistance of experiments with internal and external cooperating/collaborating partners.
- Presentation and publication of the research results as well as obtaining third party funding.

Your profile:

- University degree in Physics/Chemistry/ Biochemistry (or a similar subject) with a strong interest in life science
- Advanced experience in NMR spectroscopy
- English (advanced), German (basics)
- Knowledge in Cell-culture/ 3D cell culture is eligible
- The ability to work both independently and as a team member is an advantage
- Excellent communication skills are preferable
We offer:

- Scientific development opportunities in an international cooperative, interdisciplinary research environment and an excellent working atmosphere in a very dynamic and professional team.
- Extensive state-of-the-art equipment and infrastructure.
- Extensive “on-board” training and mobile working possibilities.
- The opportunity to present your data on international conferences and participate in workshops.

Non-residents who apply for this job will receive help from the institute to find accommodation and to handle authorities. Applications from disabled applicants are welcome. ISAS supports the principle of equal opportunity for all employees and therefore particularly encourages women to apply.

The salary will be according to the German TV-L. The full-time position is available immediately. It is fixed-termed and offered for three years.

ISAS collects and processes the personal data of its applicants in accordance with European and German legal regulations. Further information on data protection and the processing of personal data can be found at www.isas.de/datenschutzhinweise-fuer-bewerberinnen-und-bewerber.

Closing date for application is **January 14, 2023**. Complete applications with an extended curriculum vitae with full publication list, a cover letter, copies of your diplomas as well as your expertise and methodological competencies, names and contact information of 2 references, should be submitted (quoting the reference number **257/2023** in the subject header) as one pdf document to bewerbungen@isas.de. Informal inquiries are welcome and can be submitted to the Human Resources team (bewerbungen@isas.de). For further information regarding the institute, please see: http://www.isas.de/en.
